Attorney Docket No.: 28069-624N01US

AMENDMENTS TO THE CLAIMS

Listing of Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

 (Currently Amended) A pharmaceutical aerosol formulation for use in a metered dose inhaler (MDI) comprising formoterol fumarate di-hydrate in suspension, a propellant and ethanol, wherein the formoterol fumarate di-hydrate has a water content of about 4.8 to 4.28% by weight, and a steroid in suspension.

(Cancelled)

- 3. (Previously Presented) The pharmaceutical aerosol suspension formulation according to claim 2, wherein the formulation is capable of being dispensed from an MDI to provide a Delivered dose of formoterol fumarate di-hydrate that has a variance of no more than +/- 25%, of the mean Delivered dose when the formulation is stored at 40°C and 75% relative humidity for up to 6 months.
- 4. (Previously Presented) The pharmaceutical aerosol suspension formulation according to claim 2, wherein the formulation is capable of being dispensed from an MDI to provide a Delivered dose of formoterol fumarate di-hydrate with a fine particle fraction of 30 to 70%.
- 5. (Previously Presented) The pharmaceutical aerosol suspension formulation according to claim 2, wherein the formoterol fumarate di-hydrate is provided as particles having a water content of about 4.8 to 4.28% by weight suspended in the propellant and solvent, and wherein the formulation is capable of being dispensed from an MDI to provide a Delivered dose of the steroid that has a variance of no more than +/- 25%, of the mean Delivered dose when the formulation is stored at 40°C and 75% relative humidity for up to 6 months.
- (Previously Presented) The pharmaceutical aerosol suspension formulation according to claim 5, wherein the formulation is capable of being dispensed from an MDI to provide a Delivered dose of steroid containing a fine particle fraction of 30% to 70%.

Attorney Docket No.: 28069-624N01US

- 7. (Currently Amended) The formulation according to claim 2, wherein the steroid is selected from the group consisting of budesonide, ciclesonide, mometasone, fluticasone, beclomethasone, flunisolide, loteprednol, triamcinolone, amiloride, rofleponide or a pharmaceutically acceptable salt or derivative of these active compounds, selected from mometasone fluroate, fluticasone dipropionate, beclomethasone dipropionate, triamcinolone acctonide and flunisolide acctate.
- (Previously Presented) The formulation according to claim 7 wherein the steroid is fluticasone propionate.
- 9. (Previously Presented) The formulation according to claim 8 wherein the fluticasone proprionate is present in an amount of 0.05 to 2 % by weight of the formulation.
- (Previously Presented) The formulation according to claim 1 or claim 2, wherein the
 formoterol fumarate di-hydrate is present in an amount of 0.001 to 0.1% by weight of the
 formulation.
- (Previously Presented) The formulation according to according to claim 1 or claim 2 containing a cromone selected from the group consisting of a pharmaceutically acceptable salt of cromoglycinic acid, nedocromil, and mixtures thereof.
- 12. (Previously Presented) The formulation according to claim 11 wherein the cromone is present in the formulation in an amount of 0.001 to 1%.
- 13. (Previously Presented) The formulation according to claim 1 or claim 2, wherein the propellant is selected from the group consisting of fluorochlorocarbons, alkanes, fluorinated alkanes, and hydrofluoroalkanes.
- 14. (Previously Presented) The formulation according to claim 13 wherein the propellant is a hydrofluoroalkane of the general formula:

CxHyFz (I);

in which x is the number 1, 2 or 3, y and z are each an integer greater than or equal to (\ge) 1, and y+z=2x+2.

- 15. (Previously Presented) The formulation according to claim 32 wherein the propellant is HFA 134a or HFA 227 or a mixture thereof.
- 16. (Previously Presented) The formulation according to claim 1 or claim 2, wherein the propellant is employed in an amount of greater than 90% by weight.
- (Currently Amended) The formulation according to claim 1 or claim 2, wherein the ethanol is present in amounts of less than 2.5% by weight.
- 18. (Previously Presented) The formulation according to claim 1 or claim 2 comprising a surfactant selected from the group consisting of oleic acid, lecithin, sorbitan trioleate, cetylpyridinium chloride, benzalkonium chloride, polyoxyethylene (20) sorbitan monolaurate, polyoxyethylene (20) sorbitan monostearate, polyoxyethylene (20) sorbitan monooleate, polyoxypropylene/polyoxyethylene block copolymers, polyoxypropylene/polyoxyethylene/ethylenediamine block copolymers, and ethoxylated castor oil.
- (Previously Presented) The formulation according to claim 18 wherein the surfactant is present in an amount of 0.0001 to 1% by weight.
- 20. (Previously presented) A pharmaceutical aerosol formulation for use in a metered dose inhaler (MDI) comprising formoterol fumarate di-hydrate in suspension, a propellant and ethanol, wherein the moisture content of the formulation is in the range of from 50 ppm to 800 ppm.
- (Previously Presented) A vial containing the formulation according to claim 1 or claim
- (Previously Presented) The vial according to claim 21 in the form of an aluminum, uncoated container.
- 23. (Previously Presented) The vial according to claim 21 adapted to be placed in a metered dose inhaler, and capable of delivering a dosage of formoterol furnarate di-hydrate of about 3 to 15 micrograms.

Attorney Docket No.: 28069-624N01US

- 24. (Previously Presented) The vial according to claim 21 adapted to be placed in a metered dose inhaler, and capable of delivering a dosage of a steroid of about 10 to 1000 micrograms per puff.
- 25. (Previously Presented) The vial according to claim 24 adapted to be placed in a metered dose inhaler, and capable of delivering a dosage of fluticasone proprionate of about 50 to 500 micrograms per puff.
- 26. (Previously Presented) A package comprising the vial according to claim 21 comprising a label containing a dosage claim, wherein the mean Delivered dose of the active substances is no more than +/- 15% of the dosage stated on the label.
- 27. (Previously Presented) A metered dose inhaler containing the vial according to claim 21.
- (Previously Presented) A method of producing a pharmaceutical acrosol formulation according to claim 1 or claim 2, comprising drying the formoterol fumarate di-hydrate to a water content of 4.8 to 4.28%.
- 29. (Previously Presented) The formulation according to claim 13, wherein the propellant is a fluorochlorocarbon selected from the group consisting of trichloro-monofluoromethane (F11), dichlorodifluoromethane (F12), monochlorotrifluoromethane (F13), dichloromethane (F21), monochlorodifluoromethane (F22), monochloromonofluoromethane (F31), 1,1,2-trichloro-1,2,2-trifluoroethane (F113), 1,2-dichloro-1,1,2,2-tetrafluoroethane (F114), 1-chloro-1,1,2,2-pentafluoroethane (F115), 2,2-dichloro-1,1,1-trifluoroethane (F123), 1,2-dichloro-1,1,2-tetrafluoroethane (F124), 1,2-dichloro-1,1,2-tetrafluoroethane (F124), 1,2-dichloro-1,1,1-trifluoroethane (F132), 1-chloro-1,2,2-trifluoroethane (F133), 2-chloro-1,1,1-trifluoroethane (F133), 1,1-dichloro-1-fluoroethane (F141b) and 1-chloro-1,1-difluoroethane (F142b).
- 30. (Previously Presented) The formulation according to claim 13, wherein the propellant is an alkane selected from the group consisting of propane, butane and isobutene.
- (Previously Presented) The formulation according to claim 13, wherein the propellant is octafluoropropane (F218).

- 32. (Previously Presented) The formulation according to claim 13, wherein the propellant is a hydrofluoroalkanes selected from the group consisting of difluoromethane (HFA 32), pentafluoroethane (HFA 125), 1,1,2,2-tetrafluoroethane (HFA 134), 1,1,1,2-tetrafluoroethane (HFA 1434), 1,1,1,2-trifluoroethane (HFA 1433), difluoroethane (HFA 152a) and 1,1,1,2,3,3,3-heptafluoropropane (HFA 227).
- 33. (Previously Presented) A metered dose inhaler containing the vial according to claim 22.
